

This showcase will present the latest Phenom Scanning Electron Microscope (SEM) series and new accessories. Both new and existing users are invited to enjoy the demonstrations followed by additional "hands on" time for sample analysis.

Use all the latest Phenom desktop SEMs and new accessories

You're invited to attend our showcase

Thur 16th and Fri 17th Nov 2017

LOCATION:

Western Sydney University,
Parramatta South Campus,
Room EHA G49

PRESENTATION:

9am-10am or 1-2pm daily.

Following each presentation the Phenom SEM will be available for participants to operate and for sample analysis.

DEMO/HANDS ON:

**10am - 12pm or
2.00pm - 4pm**

ON SHOW:

- **Phenom ProX Gen 5** - The latest desktop SEM with enhanced imaging performance (up to 150,000x magnification and <8nm resolution), plus fully integrated x-ray analysis (EDS), fastest time to imaging (<30sec) and "never lost" navigation.
- **Phenom XL SEM** - Superfast and easy to use and provides high resolution imaging with elemental analysis of large samples up to 100mm x 100mm.
- **Phenom GSR SEM** - Automated Gun Shot Residue analysis & fully integrated elemental (EDS) detection.

PLUS NEW ACCESSORIES

- **Eucentric Sample Holder** - Unique option for quickly and safely tilting and rotating samples while imaging.
- **Tensile Sample Holder** - Examine how materials will react when they are pulled apart or pushed together.
- **Filter holder/ Resin mount holder** - For multiple sample analysis.

REGISTRATION:

Please register using the online form
